

ABSTRACT OF DISCLOSURE

Bordier Stinky Free is the air suctioned by a pump adapted by hoses, ducts and a switch to maintain an odor free environment in the restroom.

Part of this innovation consists of making a toilet bowl with built-in suction ducts. Another part of this innovation consists of a specially designed toilet bowl containing a concealed electric switch which when a person sits down to use the toilet automatically activates an air suction pump that extracts the odors from inside the toilet bowl. The suction pump will continue to work for a few more seconds after the person stands and until the timer stops it. The odors follow its direction into the sewer by way of the toilets own expulsion duct. Also, there is a footstool where the feet are rested at an elevated position. After sitting on the toilet seat in this position, it facilitates the body to have an easier bowl movement.
